

PLANNED TREE MAINTENANCE

Tree Works Notification		Created By:	
Public Scrutiny		Date:	
Tree Works reference number and schedule title			
Wards included within planned works:			
Abbey		East Chesterton	
Arbury		Kings Hedges	
Castle		Market	
Cherry Hinton		Newnham	
Coleridge		Petersfield	
Within following Council service areas:			
Highways		Housing	
		Parks	
Size of schedule – based on number of trees included within:			
Small (< 10 trees)		Medium (11 - 50 trees)	
		Large (> 50 trees)	
Brief description of the works			

Tree Works Notification

For tree works submitted under a 'Tree Works Notification' I refer you to Policy GM3 of the Cambridge City Council Citywide Tree Strategy 2016-2026 Part 2:

"All planned tree works will be published on the Council website and through site notices for the community to access at least 20 working days before implementation. The council sees this as an important tool for communicating to the local community about tree work planned for their area and the reasons why the works are necessary." <https://www.cambridge.gov.uk/tree-strategy>

The notification period will run for 20 days from the date of publication of the schedule.

The majority of the works contained within these schedules consists of minor pruning to address health and safety issues, or more significant works to remove trees that are obviously dead, dying or diseased, or replacement planting for trees that have been removed.

A brief outline of the planned works can be found in the table shown above however; full details of the planned works can be found within the attached schedules and maps.

Please note: where trees are due to be felled, these are marked on site with green tape.

Public Scrutiny

For tree works submitted for 'Public Scrutiny' A brief outline of the planned works which we wish to be publicly scrutinised can be found within the attached schedules and maps which will be available for ten working days following the date of publication.

The planned works could involve either removing healthy trees over 75mm in diameter as measured at 1.5m above ground level and/or any tree work or batch of works that will have a significant impact on the landscape character of an area as assessed by an arboricultural officer. This will include crown reductions of over 30% in branch length on trees that have not previously been reduced.

The table above provides details of the works which are open for public scrutiny, please note that some tree works schedules may contain other works in other service areas than those open to this level of scrutiny. The following details only relate to the significant works considered for scrutiny. Please note: where trees are

due to be felled, these are clearly marked on site with green tape.

I refer you to Policy GM5 of the Cambridge City Council [Citywide Tree Strategy 2016-2026 Part 2](#):

“When considering tree works on City Council land, the Council will invite resident and stakeholder comment regarding the following kinds of work:

- a) Any tree work which will have a significant impact on the character of an area.*
- b) Felling healthy trees of over 75mm diameter”*

If you wish to make a comment about any of the works proposed, please submit them via this link: [Comment on a tree work schedule](#). All unresolved objections to tree work subject to public scrutiny will be determined by the relevant Executive Councillor.

Arboricultural Works Order – EXPLANATORY NOTE

(21 June 2016)

Arboricultural Works Orders are ordered by alphabetically by ward name and by site name e.g. road, street, park.

Example of typical Arboricultural Works Order

1. The name of the Arboricultural Works Order title.

2. The site name is followed by the site code in brackets and ward location, in bold.

3. Single tree – describes the form of the tree(s) recorded. Other descriptors used include: Tree group and Group tree (multi-stemmed or multiple individuals growing in close proximity to each other), Hedge; Avenue and; Woodland.

No.1 – identifies the tree(s) on the associated map.

Akeman Street (AKEMAS) Arbury		
Single tree No: 26 (080310)	Common hornbeam o/s 1 Bateson Road	1 tree
Combined Proactive Specification		
Single tree No: 27 (080312)	Common hornbeam o/s 2 Bateson Rd	1 tree
Combined Proactive Specification		
Arbury Road (ARBURS) Kings Hedges		
Single tree No: 31 (242028)	Fastgate hornbeam o/s 90-92	1 tree
Combined Proactive Specification		

4. The works schedule item reference number invoice

5. Tree species type; followed by a brief description of it's location within the site

6. Complete schedule item including tree identification details and associated works to be applied to the tree

6. Tree Works to be applied – see glossary of terms below for an explanation of tree terms.

GLOSSARY OF TERMS USED BY CAMBRIDGE CITY COUNCIL WHEN SPECIFYING TREE WORKS

OPERATION

C/L – to....

EXPLANATORY NOTE

Crown lifting involving the removal of selected lower branches from the trunk, stems and branch system to give either a specified clearance above the surrounding ground level or other stated object

C/L - to clean stem to...

Crown lifting involving the removal of lower branches to their point of origin in addition to the lowest remaining foliage

C/O

Involves the removal of all dead, dying and diseased wood over a specified size and foreign objects from the crown of the tree.

Combined Proactive
Specification

A combined maintenance operation involving crown lifting over footpaths, cycle ways and highways epicormic removal, clearing buildings, lamp columns and sight lines to traffic signals and the removal of dead young trees on stakes.

C/R – by...

Crown reduction involves a reduction in the overall size of the crown, or a specified portion or section of it.

C/R – re-pollard

Repollarding involves the removal of all new growth back to, or at a specified distance from, the previously pollarded head

C/R - to clear BT wire by
0.5m

Localised crown reduction or directional pruning involving the removal of selected branches to clear BT wires.

C/R.C/T – growth from
reduction points by...

A combined pruning operation that involves the retention of a framework of branches formed after the first reduction by carrying out thinning and reduction works to the new growth.

C/R.C/L - clear sightlines by
0.5m

Localised crown reduction and lifting to clear sightlines to traffic signs and traffic signals.

C/T – by...

Crown thinning involving the judicious removal of selected branches and shoots to reduce the density of branches by the amount required.

Complete deadwood

Complete dead wooding involves the removal of all deadwood over a specified size.

Conservation deadwood

Conservation dead wooding involves the breaking off by hand of all deadwood over a specified size.

Coppice

Coppicing is the removal of all growth of a tree or shrub to a point close to the ground with the objective of producing a quantity of vigorous basal shoots from the retained stump.

F/P - formative prune	Formative pruning operations will be pay particular attention to the formation of a single leading shoot and the removal of poorly placed branches on young trees.
Inspection/....	Where inspection is required the tree will be checked by a competent arborist to ensure it is free from any defects or other factors that might affect the tree's health and safety.
Major deadwood	Major dead-wooding involves the removal large diameter deadwood over specified size.
R/I - with asphalt	Reinstatement of the affected area after a tree removal with specified surface e.g. asphalt, turf or grass seed.
Reduce stake by...	Young tree maintenance involving the reduction in height of the supporting tree stake by a specified amount.
Rem - deadwood	The removal of all deadwood over a specified size.
REM - epicormics	Involves the removal of basal and stem sucker growth to the trees first true branch or other specified height.
REM – lower (x) branches	Crown lifting is required to the point of origin of the lowest remaining branch in addition to the lowest remaining foliage
REM - stake	Young tree maintenance involving the removal of a tree's supporting stake.
Rem - stump	The removal of a tree stump.
Rem - tree and kill root	A combined operation involving tree felling and stump killing.
Rem - tree by root	A combined operation involving tree felling, stump removal and reinstatement of the surrounding area, where replacement planting is not being considered.
Rem - tree for replant	A combined operation involving tree felling, stump removal to accommodate a replacement tree and reinstatement of the surrounding area, where replacement planting is being considered.
Rem - tree leaving 1m high stump	Involves tree felling leaving a 1m stump.
Rem - tree to ground level	Involves tree felling as close to ground level as practicable.
Reset stake	Young tree maintenance involving the resetting of a loose stake.
Retie tree to prevent rubbing	Young tree maintenance involving the retying of a young tree to a supporting stake so that it's stem is not touching the stake.
Standard maintenance (TMP)	A combined pruning operation involving crown lifting over footpaths, cycle ways and highways and epicormic removal.

W/T - wound treatment

Superficial or severe bark wounds treated by removing any loose bark by cutting it cleanly back with a sharp knife.

Young tree maintenance

A combined maintenance operation involving formative pruning, mulching and stake management.
