

TREE WORKS NOTIFICATION – PLANNED TREE MAINTENANCE

A brief outline of the planned works can be found in the table below; however, full details can be found in the attached schedules and maps. I refer you to Policy GM3 of the Cambridge City Council Citywide Tree Strategy 2016-2026 Part 2:

“All planned tree works will be published on the Council website and through site notices for the community to access at least 20 working days before implementation. The council sees this as an important tool for communicating to the local community about tree work planned for their area and the reasons why the works are necessary.”

<https://www.cambridge.gov.uk/tree-strategy>

The notification period will run for **20 days** from the date of publication of the schedule.

The majority of the works within these schedules consist of minor pruning to address health and safety issues, or more significant works to remove trees that are dead, dying, or diseased, or replacement planting for trees that have been removed.

Works Reference number and schedule title:					
Ref:	1869 PLA DeFreville & Montague				
Wards included within planned works:					
Abbey		East Chesterton		Queen Ediths	
Arbury		Kings Hedges		Romsey	
Castle		Market		Trumpington	
Cherry Hinton		Newnham		West Chesterton	x
Coleridge		Petersfield			
Within the following Council service areas:					
Highways	x	Housing		Parks	
Brief description of the works and approximate number of trees involved					
Details of the plans and proposals to construct and plant in engineered tree pits along DeFreville Avenue and Montague Road.					

Schedule ref: 1869

De Freville Avenue and Montague Road Tree Planting

Cambridge City Council propose to replace several lost trees along De Freville Avenue and Montague Road. The purpose is to return these residential streets to impressive tree lined avenues once again, improving the appearance of the street scene and the wellbeing of people, wildlife, and the environment.

We have identified ten locations for replacement tree planting. The first phase of the works is expected this autumn and will include the construction of ten engineered tree pits using structural soil cells that will ensure your new trees successfully mature in their urban environment. Soil cells provide structural stability for paved surfaces, while their large open spaces provide ample opportunity for tree roots to grow. Details of the locations can be found on MAP 1.

Phase two will involve planting the trees, which is expected in late 2022 / early 2023. Details of the species can be found in the schedule following MAP 1.

I refer you to **Policy GM3 of the Cambridge City Council Citywide Tree Strategy 2016-2026 Part 2:**

“All planned tree works will be published on the Council website and through site notices for the community to access at least 20 working days before implementation. The council sees this as an important tool for communicating to the local community about tree work planned for their area and the reasons why the works are necessary.”

<https://www.cambridge.gov.uk/tree-strategy>

The notification period will run for **20 days** from the date of publication of the schedule.
