(CCC) WF-NTSHWWVM - CityFibre

Last year on our street we had boxes with the words "CityFibre" attached to the sides of our properties with wires going in and others coming out that go nowhere and are just left hanging from the property. I have tried to ask Cambridge City Council what this is supposed to be for but never receive a reply so I am forced to ask through this FOI request. I want documentation showing what this work was for and why it has been left incomplete and the current planned timing of its completion or scrapping.

Response:

Thank you for your request for information above, which we have dealt with under the terms of the Freedom of Information Act 2000.

I hope the following will answer your query:

City Fibre is an organization rolling out full fibre broadband infrastructure across the UK to improve digital technology. As this programme is being delivered through City Fibre rather than the city council, then the City Fibre organization would be best placed to provide any documentation and details of the timetabling. I have provided a weblink here to the organization with their contact details at the bottom: <https://cityfibre.com/>

We aim to provide a quality service to you and hope that you are satisfied with this response, however if you have any questions, please contact us.

Further queries on this matter should be directed to foi@cambridge.gov.uk
