Summary: New Homes

14,000 new homes are required in Cambridge City 2011 to 2031; 33,500 across Greater Cambridge (Cambridge City and South Cambridgeshire) as a whole.

314 new affordable homes to rent are needed in Cambridge **per annum** 2020 to 2030; 749 **per annum** across Greater Cambridge.

There were 839 net housing completions (market and affordable) in Cambridge City in 2022 to 2023; and 2,337 across Greater Cambridge.

There were 322 net affordable housing completions in Cambridge City 2022 to 2023; and 794 across Greater Cambridge

Cambridge City Council completed 248 new affordable council homes (gross) in 2023 to 2025 and 596 in the last 5 years.

See data tables below for more detailed information.

Commentary

- There remains high demand for housing and there is a significant need for new homes to be built locally.
- The need for affordable housing is also acute, with house price to income ratios remaining very high by historical standards. Both Cambridge City and South Cambridgeshire District Council require at least 40% affordable housing on larger new developments, giving significant weight to the National Planning Policy Framework affordable housing threshold applying to major sites of 10 or more dwellings.
- The combined annual completions in 2022-2023 for Greater Cambridge (2,337 dwellings) is higher than the average annual delivery rate required of

1,675 dwellings a year. This means that delivery has exceeded the required rate in five of the last six years.

- In Cambridge there was a sharp increase in completions in 2021-2022 and 2022-23 compared with the previous two years, with the largest contributions being in the Cambridge Urban Area – mainly through the council’s own house-building programme - as opposed to fringe sites.
- The main focus of the council’s own house-building programme is on delivering affordable housing, although it also includes some market housing as part of mixed developments. The number of new affordable council house completions increased sharply in 2022-23 and further again in 2023-2024. Building to Passivhaus Certified standards is a high priority moving forwards.
- The new government has a target of delivering 1.5 million homes and has committed, through its [autumn budget](#), to an additional £500m of national funding through the Affordable Homes Programme to build up to 5,000 additional affordable homes.
- The government has also committed £10m of funding to move forward with plans for growth in the Cambridge area (“Cambridge 2050” proposals) through a new Cambridge Growth Company.
- Water supply issues are affecting the approval of planning applications.

Explanation

This section of Housing Key Facts shows:

- How many homes are needed to be delivered in Cambridge, South Cambridgeshire and the two areas as a whole (Greater Cambridge).
- How many social and affordable rent homes are needed to be delivered per annum in Cambridge, South Cambridgeshire and Greater Cambridge as a whole. (The timescales do not quite tie up with the overall number of homes needed as the two figures are from different sources).
- Net numbers of homes delivered locally over the last five years for which data is available, over the same area.
- The gross number of new affordable homes completed over the last five years through the council’s house building programme, and the number projected to be completed in the current financial year.

Note that net council house completions will also be included in the data on overall numbers of homes delivered, although the figures cannot be directly compared as the methodologies are different and completions may be accounted for in different years.

Caution

Backdated changes are occasionally made to some data. Please use the most up to date version available.

Data sources

Overall number of homes needed comes from the [Cambridge Local Plan 2018](#) and the [South Cambridgeshire Local Plan 2018](#).

The number of affordable homes needed comes from research evidence used to support the development of the emerging Greater Cambridge Local Plan [GL Hearn, Housing Needs of Specific Groups, Cambridgeshire & West Suffolk, October 2021](#).

Net Numbers of market and affordable homes delivered are from the latest [Authority Monitoring Report for Greater Cambridge](#)

The number of new council homes delivered and projected is from internal data.
